

Real Life

Kimbra

If I had to find a process
What it would it be?
To try and make progress
Where would I reach?
No chance for a regret to invade
In my real life, real life, real
It's my real life, real life, real
If I had to pick a program to rewire
Heart to be unbroken
Would I change real life, real life, real life?
Now it's real life, real life, real
Nothing to find, nothing to find
Nobody got time to realize
Real life
Nothing to find, nothing to find
Nothing to fear if you lose your mind
Just keep your head up in the real life
Just keep your head up in the real life
It's real life
