

Falling Apart

Combichrist

You've got to pay!
I said it! I admit it:
conflicting now as it was falling apart
Just like a tree melting on sun
Don't want to be sorrow rage
Still you do bizarre
No sack with whatever awoken
I will sparing now suffer condition Back off get out of the way too late
Do you feel pity
you're standing alone
When it falling apart, falling apart
Nothing will rise admit it
You should be falling abroad
Threaten yourself but dont think a come
I move forward you performing behind
Still tricks the best
Tricks the beast
we are always were spoken
This is where I do blood like this Back off get out of the way too late
Do you feel pity
you're standing alone
When it falling apart, falling apart
As it falling apart
As YOU falling apaaart! You think you're better than me if this is apart?
You think you're better than me when the price is so high
We both got money on paid no lust
