

# Something Special

John Conlee

You oughta be a one man woman  
One woman is all I need  
Someone to love and care for  
That will love and care about me  
If you've been searching for that kind of man  
He's standing here looking at you  
If you're looking for an answer, darling I do  
I'll be your something special  
Two arms you can call home  
One lover's life to give you  
That you can call your very own  
I'll be your something special  
Always ready and waiting to please  
If you just be something special to me  
I'm tired of woman to woman  
I just need one woman to love  
I wanna stop all my running around  
And let the world revolve around us  
And I can tell, you know just what I'm saying  
You know exactly how I feel  
So if you're looking for an answer, darling I will  
I'll be your something special  
Two arms you can call home  
One lover's life to give you  
That you can call your very own  
I'll be your something special  
Always ready and waiting to please  
If you will just be something special to me  
I'll be your something special  
Two arms you can call home  
One lover's life to give you  
That you can call your very own  
I'll be your something special
