

Crime (feat. Skott)

Grey

Tipping toeing down your spine
When everyone's around
Kiss me hard forget them judging eyes
Who cares about what is to come no
I don't fear the night
Let's show em what it is to be alive If nothing is for keep, can I keep you just for a minute?
I don't know what's real but I really wanna feel you now
Get a little too close can I stop your heart for a moment?
I don't even care, is that really such a crime?
I don't even care, is that really such a crime?
Shed your layer lay with me let's waste a little time
And if it's all burn down well that's just life Ooooooh we're all going anyways
So let's let it out too loud
If nothing is for keep, can I keep you just for a minute?
I don't know what's real but I really wanna feel you now
Get a little too close can I stop your heart for a moment?
I don't even care, is that really such a crime?
I don't even care, is that really such a crime? I don't even care, is that really such a crime?
I don't even care, is that really such a crime?
