## HammerFall

Silent screaming,  
You're on your own  
Balancing on a blade between  
Whats right and what is wrong  
Don't loose your faith, don't sit there in silence  
show your strength, let's hail the metal gods, bare your heart  
All for one, our burning hearts will  
live forever  
One for all, together standing strong  
Hammerfall, we will prevail  
Hammerfall, let us hail  
Hammerfall, let us hail  
We share a dream, the future is ours  
A metal heart is hard to tear apart, heed the call  
A flash of light calls out the providers  
We run this race, but we will never crawl, all hail Hammerfall  
All for one, our burning hearts  
will live forever  
One for all, together standing strong  
Hammerfall, we will prevail  
Hammerfall, let us hail  
Hammerfall, let us hail  
Just follow your heart, don't listen to the crowd  
The wisdom, the voice is calling from inside  
The time long forgotten will soon come again  
Prepare for the meeting, the gods of metal reign
