Just One Drink

Jack White

You drink water I drink gasoline One of us is happy One of us is mean I love you But honey, why don't you love me? Yeah, well, I love you But honey, why don't you love me?Just one drink gets me closer Just one drink, it rolls you over But then I start to think you're growing colder The older and older, I am Well, I watch TV You watch the ceiling And when you turn over I get a funny feeling I should grab my rock and rye And pop the top until my baby comes clean Yeah, I should grab my rock and rye And pop the top until my baby comes cleanWell, just one sip and then you showed me You bust your lip, I want spottieottie So, c'mon take one trip if you wanna know me And put a fork in the road with me AlrightJust one drink gets me closer Just one drink, it rolls you over But then I start to think you're growing colder The older and older, I am You drink water I drink gasoline One of us is happy One of us is mean I love you But honey, why don't you love me? Yeah, well, I love you But honey, why don't you love me?Yeah, I love you Honey, why don't you love me? I love you Honey, why don't you love me? Oh!
