Magic Town

The Vogues

They told me the streets were all paved with gold But these dirty sidewalks are gray and concrete cold They said neon lights were a beautiful sight But how 'bout the one blinkin' in my room all nightAnd where's the magic in this magic town Where's the good life they said could be found Where's the magic to make all my big dreams come true gotta find it girl before I send for youThey said in this town you get rich in no time But here I am and I'm down to my last dime I just don't know why I bother to try When nobody here gives a hang if I live or die And where's the magic in this magic town Where's the good life they said could be found Where's the magic to make all my big dreams come true gotta find it, girl before I send for youAnd where's the magic in this magic town Where's the good life they said could be found Where's the magic to make all my big dreams come true I'm gonna find it, girl, if it can be foundBefore I bring you toThis magic townThis magic town (repeat to fade)
