

# Pyramid

## Two Door Cinema Club

Take me through the pyramid  
Show us life and things that you did Each and every thing I see  
Takes me back before I was me We have seen what lies beneath the earth  
Everything that has ever been and will become Where are all these singing birds  
We would say but that's not what we heard We have seen what lies beneath the earth  
Everything that has ever been and will become We have seen the world for what it's worth  
Everything that's in between can still be done Just one day is all that we needed so we could  
believe it all  
In some way we already knew it, we just had to prove it all We have seen what lies beneath the  
earth  
Everything that has ever been and will become  
We have seen the world for what it's worth  
Everything that's in between can still be done
