

# Nowhere Bound

## Diamond Rio

You save up your money boy, bought you some shoes  
The highway's calling you and she's  
Just when you thought you had it beat  
But now you're leaving town on a one-way street. Chorus:  
It's a hard, hard lesson  
But you're gonna have to learn it  
It's a long cold swim up against the current  
And somewhere down the line  
You're gonna have to turn it, around  
'Cause boy right now you're nowhere bound. Her words still echo through your mind  
But fade away as you cross the county line  
Running from trouble or from the truth  
It doesn't matter either way you lose.  
Chorus:  
It's a hard, hard lesson  
But you're gonna have to learn it  
It's a long cold swim up against the current  
And somewhere down the line  
You're gonna have to turn it, around  
'Cause boy right now you're nowhere bound. --- Instrumental --- Well, you walk ten miles just to  
make new tracks  
But you turn around and find that it's twenty miles back  
And it's never gonna change it you keep leaving  
Your heart's gonna break, but never break even. Where to now, do you know?  
One thing's for certain  
Gonna reap just what you sow  
And all you planted was heartache and pain  
Don't look now but it looks like rain.  
Chorus:  
It's a hard, hard lesson  
But you're gonna have to learn it  
It's a long cold swim up against the current  
And somewhere down the line  
You're gonna have to turn it, around  
'Cause boy right now you're nowhere bound. Nowhere bound Nowhere bound...
