

Stella

Galantis

Stella

Got the conversation that I like
Serving tables way after midnight
Stealing hearts away like a thief in the night
As you move through the dark
Stella
Turn my way when nobody's watchin'
Stars collide like boom when we're touchin'
Lightin' up the sky, well I like what I see
And I know what I like
Dance with me like lovers do
Break these chains, take this heart home with you
So won't you dance with me like lovers do?
Dance with me, take this heart home with you

Stella

Got me lit and I wanna show ya
Feel you close, but need to be closer
My supernova
Like a thief in the night
As you move through the dark
Dance with me like lovers do
Break these chains, take this heart home with you
So won't you dance with me like lovers do?
Break these chains, take this heart home with you
So won't you dance with me (Just dance with me) like lovers do?
Dance with me, take this heart home with you
Dance with me, dance with me
Dance with me, dance with me like lovers do
So won't you dance with me like lovers do?
Break these chains, take this heart home with you
So won't you dance with me (Just dance with me) like lovers do?
Dance with me, take this heart home with you
Dance with me, dance with me
Dance with me, dance with me like lovers do
