

# Kiss and Not Tell

## La Roux

Ten thousand stories and two lovers disguised  
You've seen the future, now a love that is blind  
    Makes you want to kiss and not tell  
    Makes you want to kiss and not tell  
You've dialed that number now, so where's the surprise?  
    Temptation's callin' you, a secret reply  
    Makes you want to kiss and not tell  
Makes you want to kiss and not tell All along the path, feelings I can't tell  
    Makes me want to kiss and not tell  
You say in evidence, they won't take you alive  
But when the sun goes down you can't realize  
    Makes you want to kiss and not tell  
    Makes you want to kiss and not tell  
You've got the elegance but it's weighin' you down  
And sometimes you just need a night on the town  
    Makes you want to kiss and not tell  
    Makes you want to kiss and not tell  
    All along the path, feelings I can't tell  
    Makes me want to kiss and not  
And all I want is to come right out my shell  
    Makes me want to kiss and not tell
