Kiss and Not Tell

La Roux

Ten thousand stories and two lovers disguised You've seen the future, now a love that is blind Makes you want to kiss and not tell Makes you want to kiss and not tell You've dialed that number now, so where's the surprise? Temptation's callin' you, a secret reply Makes you want to kiss and not tell Makes you want to kiss and not tellAll along the path, feelings I can't tell Makes me want to kiss and not tell You say in evidence, they won't take you alive But when the sun goes down you can't realize Makes you want to kiss and not tell Makes you want to kiss and not tell You've got the elegance but it's weighin' you down And sometimes you just need a night on the town Makes you want to kiss and not tell Makes you want to kiss and not tell All along the path, feelings I can't tell Makes me want to kiss and not And all I want is to come right out my shell Makes me want to kiss and not tell
