

# Fly Here Now

Leona Lewis

Doesn't matter what you say  
Just tell me what would you do  
When I miss you like this baby  
Gotta teleport your molecules  
give you wings so you can fly

Hi-i-i-i-igh

I'd give you wings so you could fly to me across the sky

I'm tired of talking baby

Say yes or no not maybe

I need your body here with me

(I need your body here with me) This might sound crazy but

Just fly here right now

Glide like an airplane and

Just fly here right now

There's nothing there to hold you down

there's nobody that's strong enough

Aren't you tired of living on the ground

Well tonight we're going to live it up

Take a trip across the sky

Hi-i-i-i-igh

Spread your wings and fly

This aint a hard decision

Your stronger than jet engines

There's no excuse for you to be

there's no excuse for you to be so far from me This might sound crazy but

Just fly here right now

Glide like an airplane and

Just fly here right now

People say that we

We can't fly

But we can defy

Gravity tonight we'll fly

People say that we

We can't fly

But we can defy

Gravity

If we can just do something crazy This might sound crazy but

Just fly here right now

Glide like an airplane and

Just fly here right now This might sound crazy but

Just fly here right now

Glide like an airplane and

Just fly here right now
