

# Open Fire (feat. Daniel Johns)

## SLUMBERJACK

We're a long way  
From the cold nights  
And that old place we found love  
And I've been so caught up  
In the moment we got lost  
And it all changed  
When the spotlight came my way  
That led to another  
Then you're gone  
Open fire  
Stranded over now where I lost you  
Hoping to find  
Where did it all go wrong?  
Do you know?  
Do you know?  
Do you know?  
Do you know?  
Do you know?  
Open fire  
Stranded over now where I lost you  
Hoping to find  
Where did it all go wrong?  
Do you know?  
Was it always in your mind  
Were you ok all along?  
Did I make some of the? that you were going  
It's my fault  
But it all changed  
When the spotlight came my way  
What could have told me  
Right in the moment  
What you waiting for?  
Open fire  
Stranded over now where I lost you  
Hoping to find  
Where did it all go wrong?  
Open fire  
Stranded over now where I lost you  
Hoping to find  
Where did it all go wrong?  
Ooo  
Open fire

Stranded over now where I lost you  
Hoping to find  
Where did it all go wrong?  
Ooo  
Do you know?  
Do you know?  
Do you know?  
Do you know?
