Till I Found You

Marty Stuart

When I was a young man I thought I knew everything
But I didn't know nothing, till I found you
I used to get around some, I thought I'd seen everything
But I hadn't seen nothing, till I found youTill I found you there was no light, nothing ever worked out right
Baby it's true, till I found youEverybody's searching, they're trying to find something
But I don't need nothin', now I've found you
'Cause you're the only one love, the only one I'm sure of
And all I want is your love, now that I found you
Till I found you there was no light, nothing ever worked out right
Baby it's true, till I found you
Baby it's true, till I found
