

Skin & Bone

Out Came the Wolves

My bodies fading like the sun
A photograph of skin and bone
My mind is breaking like the gun
I'm finding faith in the unknown Don't fail me now
I want you to stay
If you die than I die and we die in vain
Don't fail me now
You don't have to change
If you die than I die and we die in vain
I've got a photograph with me
Of everyone I used to know
My fear of failure keeps me blind
So ill smile and let it burn my eyes Don't fail me now
I want you to stay
If you die than I die and we die in vain
Don't fail me now
You don't have to change
If you die than I die and we die in vain I found a way to suffocate the fear inside of me
I found a way
I found a way to suffocate the fear inside of me
I found a way
I found my way to hell (My bodies fading like the sun)
Don't fail me now
I want you to stay
If you die than I die and we die in vain
Don't fail me now
You don't have to change
If you die than I die and we die in vain
