

# Another Kind of Green

## John Mayer Trio

Sara's friend she lost her mind  
She left him and made it look sexy now  
I fear you won't be far behind  
Thinking I'll be the next to leave  
I know I might be anxious  
But I'm still not crazy And I don't need another kind of green to know I'm on the right side with  
you I used to be the one you saw  
When crying alone to sad songs  
But then we go and we hit the wall  
When nothing has changed and nothing's wrong  
You're not the perfect hand  
But I don't hit on nineteen  
And I don't need another kind of green to know  
I'm on the right side  
I'm on the right side with you  
With you So go and drift away from me  
Adopt some new philosophy  
That doesn't hold the two of us in mind  
Move into someone else's place  
Stare into some other's eyes  
But slowly only come to realize  
That you didn't need another kind of green to know  
I'm on the right side  
You're on the right side  
I'm on the right side with you  
Oh, I was on the right side  
You don't need to lose to know that you had it good  
You don't need to lose it to know that you had it good  
You don't need to lose it to know that you had it  
Know that you had it  
Know that you had it  
Don't need to lose it to know that you had it good
