

Dynamite (feat. Christina Novelli)

Gareth Emery

Watching the sky light fall to black
Feeling like the lights never coming back, no
When it's dark, and there's no one
I will be here, I'll be here And its all for you
Every spark in every flame
All for you
And all the stars will know your name Like a blazing light, ready to ignite
We are made of dynamite
Fireflies burning through the night
We are made of dynamite Like a blazing light, ready to ignite
We are made of dynamite
Fireflies burning through the night
We are made of dynamite
Like a blazing light, ready to ignite
We are made of dynamite
Fireflies burning through the night
We are made of dynamite
Blazing light
We'll show
Blazing light
We'll show
