

# Dynamite (feat. Christina Novelli)

Gareth Emery

Watching the sky light fall to black  
Feeling like the lights never coming back, no  
When it's dark, and there's no one  
I will be here, I'll be here And its all for you  
Every spark in every flame  
All for you  
And all the stars will know your name Like a blazing light, ready to ignite  
We are made of dynamite  
Fireflies burning through the night  
We are made of dynamite Like a blazing light, ready to ignite  
We are made of dynamite  
Fireflies burning through the night  
We are made of dynamite  
Like a blazing light, ready to ignite  
We are made of dynamite  
Fireflies burning through the night  
We are made of dynamite  
Blazing light  
We'll show  
Blazing light  
We'll show
