

Big Sky (feat. Tom G. Warrior)

Probot

My world has died
All gusts and leaves
Your wondrous life
And love have ceased
And all you've touched
Is dead and gone
And night for night
We're all alone
Big sky throning over the tree
You've left behind
Through these tears lost
By your forlorn only child
Big sky throning over the tree
You've left behind
It hurts inside
This silence new
And yet i know
The wind is you
And all you've touched
Is dead and gone
And night for night
We're all alone
Big sky endless in your overwhelming pain
Free at last into the light behind this eternal rain
Big sky endless in your overwhelming pain
You'll never pale
You're never gone
And all within
I'm not alone
Big sky
