

# I Found Away (feat. Douglas P)

## Alkaline Trio

Stumbling through the dark  
With a broken heart  
All alone at it once again  
Seeping in like a feeling you haven't felt since way back when  
In the dead of that night  
Like the summer of Sam  
I got word of the promotion You caused me a telegram  
And got all worked up  
We got all worked up  
I found a way Over the fear and through the flames  
I'm diving in don't follow me  
Stay right here I'll be back for you someday  
I found a way  
It'd be best if you just stayed  
It's not safe don't follow me  
I found a way  
I found a way Frozen in the lights of a locomotive  
Tied to the tracks again You said you haven't felt this comatose  
since you can't remember when  
Fly off the handle every time we sleep  
Straight off the deep I found a way  
Over the fear and through the flames  
I'm diving in don't follow me  
Stay right here I'll be back for you someday I found a way  
It'd be best if you just stayed  
It's not safe don't follow me  
I found a way  
I found a way  
Awaay  
Awaay  
From the top of my lungs The truth shall be sung  
Sharp and damning  
Violently stabbing at secrecy  
That look on your face It's more than I can take  
It's scaring  
The living hell straight out of me (straight out of me)  
I found a way  
Over the fear and through the flames  
I'm diving in don't follow me  
Stay right here I'll be back for you someday  
I found a way  
It'd be best if you just stayed

It's not safe don't follow me

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way

I found a way
