

# Savage

## Lights

I was hangin' next to you  
By a thread from so high  
We were heaven and the moon  
In the center of my eye  
And now it shines on you  
And I would kiss your crown  
And then out of the blue  
You would cut me down, cut me down  
But when you hung up the phone and you blocked my  
number  
I was alone in the rain and thunder  
I should have known when you sent me under  
I'm on my own and it made me wonder  
What do you do when a man don't love you?  
He takes the sun from the sky above you  
How do you fix the damage? How do you break the habit?  
I never knew you could be so savage  
So savage  
I never knew you could be so...So just say it like you mean it  
Won't you scream it out like it's religion  
You were the priest and the prophet  
You were my scripture and my conviction  
But when you hung up the phone and you blocked  
my number  
I was alone in the rain and thunder  
I should have known by the flame I'm under  
I'm on my own and it made me wonder  
What do you do when a man don't love you?  
He takes the sun from the sky above you  
How do you fix the damage? How do you break the habit?  
I never knew you could be so savage  
So savage  
I never knew you could be so savage  
So savage  
Oh in a flash flood of cruelty  
You washed the ground out from under me  
And oh you were through with me  
I was swept away  
What do you do when a man don't love you?  
He takes the sun from the sky above you  
How do you fix the damage? How do you break the habit?  
I never knew you could be so savage  
You could be so savage  
You could be so savage  
So savage

I never knew you could be so savage
