## **Moon Proof**

## **Globelamp**

I'll stay awake Until time stops &

I can breathe in The vacuum where it

Used to be - until then

I'll waste what I can't

Wait - become, create, no

Went no where no how

No whyI keep thinking the best

View of life must be from

The roof cuz then i'll

See when it comes crashing

Maybe if we love each

Other long enough we'll

Be moon proof

Moon proof

We'll own the tides & call it inKeep on hoping gravity

Will fall itself learn

It's lesson keep us floating

Can't stop wanting moments

To stay

It's just loves laws making

Me seek the cure, the causeI keep thinking the best

View of life must be from

The roof cuz then i'll

See when it comes crashing

Maybe if we love each

Other long enough we'll

Be moon proof

Moon proof

We'll own the tides & call it inIt's just loves laws

Making me sick,

Making me seek,

Making me sick

The cure's the cause

The cure is the causeI keep thinking the best

View of life must be from

The roof cuz then i'll

See when it comes crashingMaybe if we love each

Other long enough we'll

Be moon proof

Moon proof

## We'll own the tides & call it in
