## Poetry in the Streets (feat. Ill Bill)

## Necro

(Necro)

Uh

Peep the killer shit Death murder rap shit

Bitch

Check itThe press, runs the tape records the bloody mess documentations of the human race, can study death they'll reach in through your TV speaker they'll feature

a creature that'll beat ya to death, if he can meet ya your executed when your electrocuted who's responsible for a homeless man thats dead and smells putrid

we murdered your natural flesh after bein thrown in a river you'll be frozen forever into a statue of death a grasshopper in the lab dead

stabbed in the head

knives are like the hands of a crab jabbin your flab till you wrapped them and bled

throw you off a building killin off your children

drillin' holes in your corpse till your spillin' the colours of a million

i'll split your brains i'll slit your vains

the impact of a bat cracked across your back

is like gettin hit by a train

i'll stick a fang in your blood bank

then strangle

my shangle bangle

you like the triangle

piece of an angle

I think my shit's too brutal for most I might be the only one capable digesting the dose

you won't survive a screw driver driven inside your throat

choke on blood and saliva another kaniver croaks

## **CHORUS:**

that become reality

It's poetry in the streets of the big apple and a vitality found in few other places but look beneath the surface of the city and you shall uncover a steamin sesspool of human emotiongun sour, a planet, where nightmares witness the brutality
its poetry in the streets of the big apple
you get tackled

and grappled to the floor, white slaved up and shackled I spit on your grave, piss in your mouth, and shit on your face grind you into slop meat and serve you to your friends

we movin bad taste
another brutal shootin rampage
turnin humans to ashtrays
doobies to crack slaves
and boobies that lactate,
squirtin mad milk, i never have guilt
i have krills, i'll have you fags killed
in front of your mom and dads grill

splatterin both of them with pieces of your explodin head brain fragments stainin' clothing red i make you love the pain, it hurts

we make music for drug addicts, pieces of shit, that love the dirt its psychological

> i'm like havin a rifle shot at you we not the type that smile at you we the type that bite at you slit your throat with the broken bottle

pieces of jagged glass stabbin' you through your fuckin eyeballs
have you swallowin cyanide screamin die whores
kill your physical first, next your minds lost
leave you in the funeral home you make a fine corpse
got you splattered across the walls with my nine tongs
murder you execution style like a crime boss
travel through time and terminate you like a cyborg

my mentallity's grind coreChorus
