

Skin & Bone

Ambrosia Parsley

Hey mystery, come paint my face
No laughing, no dancing, just look at this place
You can have all the butterflies back
Listen I'll volunteer be right back
Just please leave him alone Fast and easy, mean and slow
What's the difference let him stay I'll go I'm skin and bones so just leave him alone
Won't you please, look at me, understand We're history, unwashed and unsaid
I left my best dress and my shoes on the bed
Listen here, say this could be fun
I swear I'll kick and scream 'till you're done
Oh no, copy paste again, I'm always on the run forever
I'm skin and bones so just leave him alone
Won't you please, look at me, understand
I'll take the great unknown
All the beauty's been blown
From the sky, from the sea, from the sand
