

# I Remember (Hector Fonseca & Esteban Lopez Remix)

Betty Who

Warm nights, slow hands, you let me sleep  
In your arms with your heart in front of me  
Sweet words, small clouds  
You said to me you'd be loving me forever We got lost in the night  
Now we're stumbling through the dark  
And sometimes I wonder why we have to work this hard  
But here we are I remember nobody loves me like you do  
(I remember, I remember)  
I remember I don't want perfect, I want you  
(I remember, yes I remember)  
You know you're the only one  
How could I forget this love?  
I remember no matter what it's me and you  
(I remember, yes I remember)  
Long nights that month you went away  
Phone calls, your voice, it's not the same  
So you drove all night just to say  
You'd be loving me forever We got lost in the night  
Now we're stumbling through the dark  
And sometimes I wonder why we have to work this hard  
But here we are I remember nobody loves me like you do  
(I remember, I remember)  
I remember I don't want perfect, I want you  
(I remember, yes I remember)  
You know you're the only one  
How could I forget this love?  
(Yeah, yeah, yeah)  
I remember no matter what it's me and you  
(I remember, yes I remember)  
Dancing under the stars  
Kissing you in the dark  
I remember your love, oh  
Never giving you up, giving you up, oh  
Dancing under the stars  
Kissing you in the dark  
I remember your love, oh  
Never giving you up, giving you up I remember nobody loves me like you do  
(I remember, I remember)  
I remember I don't want perfect, I want you (I want you)  
(I remember, yes I remember)

You know you're the only one  
How could I forget this love?  
(Yeah, yeah, ohh)  
I remember no matter what it's me and you  
(I remember, yes I remember)  
No matter what, no matter Dancing under the stars  
Kissing you in the dark  
I remember your love, oh  
Never giving you up, giving you up, oh
