

What I Need

Crystal Waters

I said I'm tired and lost
I said I'm sick and tired
I'm tired of feeling the same Well, I've been searching
Been looking so long
Forgot what the hell
What I was looking for Uptight, nothing right
Can't sleep, can't eat
All night in bed I cry
Need somebody by my side I feel my heart and soul
I feel the beat
I wish someone would give me
What say? What say?
What I need, I need
What I need, I need
I need something to come over me
Lift me up and set me free Someone who can give me
What I need, I need
What I need, yeah I said I'm lonely
And I don't believe
I've been waiting long
For someone to believe in But I been talking
Been talking so long
I forgot what the hell
What I was talking 'bout
I'm uptight, nothing right
Can't eat, can't sleep
All night in bed I cry
Need somebody by my side I feel my heart and soul
I feel the beat
I wish someone would give me
What I say, what I say
What I need, I need
What I need, I need I need something to come over me
Lift me up and set me free
Someone who will give
What I need, I need
What I need, I need I need something to come over me
Lift me up and set me free
Someone who will give
What I need, I need
What I need, I need I said I'm uptight, nothing right
Can't eat, can't sleep

All night in bed, I cry
Need somebody by my side I feel my heart and soul
I feel the beat
I wish someone would give me
What I say, what I say I said I'm uptight, nothing right
Can't eat, can't sleep
All night in bed, I cry
Need somebody by my side I feel my heart and soul
I feel the beat
I wish someone would give me
What I say, what I say I said I'm uptight, nothing right
Can't eat, can't sleep
All night in bed, I cry
Need somebody by my side I give my heart and soul
I give 'em me
I wish someone would give me
What I say, what I say What I need, what I need, I need
I need something to come over me
Lift me up and set me free
Someone who will give
What I need, I need
What I need, yeah I need, what I need
I need, I need
What I need, I need
I need, I need
What I need, I need I need, I need
What I need, I need
I need, I need
What I need, I need
