

# We Will Always Love You (feat. Blood Orange)

## The Avalanches

Since I saw you last there's been many a sunset  
And every day we're apart seems like a week  
Oh, but I know you would love to hear when we first met  
But every day we're apart seems like a week Since I saw you last there's been many a sunset  
(You don't need to break it)  
And every day we're apart seems like a week  
(Gold is all you see)  
Oh, but I know you would love to hear when we first met  
(I don't even understand)  
Every day we're apart seems like a week  
Draped in monotony  
What's my life gotten me?  
Hard to be glorious when two minds meet in the corner  
And a story is being told  
By me to you, take another hit, what else to do?  
Think about leaving the house  
But my fears aren't letting up We'll always love you but, that's not my fault  
We'll always love you but, that's not the point  
(It's all our fault and they tell me you look pale)  
We always loved you  
(We'll always love you but, that's not the point)  
Night time, I'm fine dreaming of another life  
Night time, I'm fine dreaming of another life  
Night time, I'm fine dreaming of another life  
(We'll always love you but, that's not the point)  
Night time on fire dreaming of another life  
Night time, I'm fine dreaming of another life  
Night time, I'm fine dreaming of another life
