

Everyone Is Gay

A Great Big World

If you're gay, then you're gay
Don't pretend that you're straight
You can be who you are
Any day of the week
You are unlike the others
So strong and unique
We're all with you If you're straight, well that's great
You can help procreate
And make gay little babies for the whole human race
Make a world we can live in
Where the one who you love's
Not an issue
'Cause we're all somewhere in the middle
We're all just looking for love to change the world
What if the world stops spinning tomorrow
We can't keep running away from who we are If you're gay, then you're gay
If you're straight, well that's great
If you fall in between
That's the best way to be
You've got so many options
Every fish in the sea wants to kiss you 'Cause we're all somewhere in the middle
We're all just looking for love to change the world
What if the world stops spinning tomorrow
We can't keep running away from who we are
And we're all here in it together
We're one step closer to breaking down the walls Everyone is gay
Hooray!
