

Past It All

Nonpoint

this is getting old
the way that you speak to me
never could decide
how you wanted us to be
i never know when your speaking sincerely
why wont you show your intentions towards me you think you know, the answers to everything
why wont you go, my own way this time
and when you show me that you can be trusted
that i will show, the truth in your life
past on the time we wasted, i saw the end
this wasn't what you said, it would be when i
heard the words and then began, past it all
this wasn't what you said when, it would be when i got there why does it always have to be your
way, your way
i tried you way before, don't wanna try it anymore
why can't you let me do this my way, my way
i'm tired of the end, the means are all pretend past on the time we wasted, i saw the end
this wasn't what you said, it would be when i
heard the words and then began, past it all
this wasn't what you said when, it would be when i got there they didn't even recognise, me
when i got there, when i got there, when i got, when i got there...
past on the time we wasted, i saw the end
this wasn't what you said, it would be when i
heard the words and then began, past it all
this wasn't what you said when, it would be when i got there
