

Baby Blue

Out Came the Wolves

Run the water, run the water
To calm the noise again
Numb the pain, numb the pain
Cause no one's listening
I want you to know
You don't have to change
I want you to know You're never too far away
You're never too gone to save
You never have to change yourself to misery
You're never too far away Never ending, never ending
Today's just like the last
Another victim, another game
I want you to know
You're more than this pain that you feel inside
You're only a prisoner if you give up
So don't give up
A prisoner
But I won't give up on you You're never too far away
You're never too gone to save
You never have to change yourself to misery
You're never too far away Break out
Don't live your life in doubt
Break out
I've been so down and alone
I've been so lost and afraid
But now I now I can bare the weight
You're never too far away
You're never too gone to save
You never have to change yourself to misery
You're never too far from me From me.
