

Let Me Remind You

Sugarland

[Verse 1]

Chills on my skin, I wanna feel that again
Bodies can talk, no words at all, and we said everything
Yeah, I left tie the hands of the clock
We were just getting started babe, we couldn't stop
Reckless, breathless in case you forgot[Chorus]

Let me remind you

My touch can always find you
Follow this, my kiss will guide you
It's time to speak the way love understands
Like a language you'll never forget it
It can show us the way if we let it take us
So slow down, I know how

Let me remind you

Let me remind you

[Verse 2]

Let me remind you, when we first met
Do you remember? 'Cause I will never forget
The way you held my hand, the way you held the door
The way you held me the way no one's ever held me before
When I wake and your face shines above me
No morning breaking like waves when you love me
Pulling me in all over again[Chorus]

Let me remind you

My touch can always find you
Follow this, my kiss will guide you
It's time to speak the way love understands
Like a language you'll never forget
It can show us the way if we let it take us
So slow down, I know how

Let me remind you

My touch can always find you
Follow this, my kiss will guide you
It's time to speak the way love understands
Like a language you'll never forget it
It can show us the way if we let it take us
So slow down, I know how

Let me remind you

Let me remind you

[Bridge]

Gods and poets weep their diamonds
We may look down to find us

Tangled and shining and timeless
I give 'em all to you
Like the stars when they dance and align to
Hearts beating and breathing in time to
Every curve, every curve
It's how they designed you [Chorus]
Let me remind you
My touch can always find you
Follow this, my kiss will guide you
It's time you speed the weight up on the stands
Like a language you'll never forget it
It can show us the way if we let it take us
So slow down, I know how
Let me remind you
My touch can always find you
Follow this, my kiss will guide you
It's time to speed the way love understands
Like a language you'll never forget it
It can show us the way if we let it take us
So slow down, I know how
Let me remind you
Let me remind you
Let me remind you
