Always (Bimbo Jones Extended Mix)

Plumb

Out of nowhere

You came

From a little dust

And a little rain

And when I looked down at

Your face

It showed to me

The truth and graceI will always try to keep you very safeSo open up your eyes

So they can look in mine

And see a small reflection

And when you close your eyes

I pray the thoughts inside

Are beautiful and true

I won't always

Be this strong

And I won't always

Be the one

To kiss the bruise

Or heal the scrapes

To wipe the tear drops

From your faceBut I will always love you more each daySo open up your eyes

So they can look in mine

And see a small reflection

And when you close your eyes

I pray the thoughts inside

Are beautiful and trueI will always love you more each day

I will always try to keep you safe

So open up your eyes

So they can look in mine

And see a small reflection

And when you close your eyes

I pray the thoughts inside

Are beautiful and trueI will always

I will always ... love you
