Burning Man

Third Eye Blind

The rise and fall of my sloppy love The smatterings, and splatterings They'll get you I'm not the one you were thinking of Maybe you thought I'd call Instead of crashing down your hall Hold me down, I wanna find out You know you will never get what you need Blue Diamond strike 'em anywhere First we caffeinate then incinerate We'll get you And sparks will fly in the summer air Did you pull out of your stall Maybe I'll see you after all Hold me down, I wanna find out We say no, cause I live my life like a burning man Like a burning man, a burning man Like a burning man And I won't get enough until my legs are broken The stars they shine in an empty void Life is not to fear, life is to enjoy He'll get you Oh, Mr. Death catches all someday Baby I thought you'd call Or leave a light on in the hall Hold me down but I'll find out We say no, cause I live my life like a burning man Like a burning man, a burning man Like a burning man Hold me down, I wanna find out We say no, cause I live my life like a burning man Like a burning man, a burning man Like a burning man And I won't get enough, until my legs are broken Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
