

# Give Me Life

Daniel Powter

Right directions, I've problem with your friends  
Understand my point of view  
And I'm not bothered, I break before I bend  
Give me life, give me life for what I do I can't remember and everything's the same  
And what you think that I should be  
You pushed me backwards, I played the stupid game  
Give me life, give me life for what I say And the moment that you lose yourself  
You wish that you were someone else  
And the only thing that comes apart  
To take respect from were we start  
'Cause I got no excuses for the way I talk to you  
But you don't compromise you nothing new  
Let's get together to see what we've become  
Give me life, give me life for what I've done, yeah What's the answers, I fall between the cracks  
I'll be happy when we sink  
I was promised if you're through with us  
Give me life, give my life for what I think And the moment that you lose yourself  
You wished that you were someone else  
And whatever else is going on  
Everyone will know once you're halfway gone  
You got no excuses for the way you treated me  
And I don't compromise too easily  
Let's stay together to see what we've become  
Give me life, give me life for what I've done Give me life, give me life for what I've done  
Give me life, give me life for what I've done
