

# Let the Night (Vanilla Ace Remix)

## Dirty Vegas

Take a look at yourself  
You're going somewhere  
Such a beautiful thing  
And it feels right  
No, it's never too late  
To believe in something  
And open your eyes

See what the world is saying You should see how good you look right now  
You should see how good you look right now Let the night, let the night, let the night, let the  
night

Follow you

Let the night, let the night, let the night, let the night

Follow you

Take another deep breath  
Look at your reflection  
You're a beautiful thing  
And it feels right Give a little bit more  
Try a little bit harder  
Can do anything

Hear what the world is saying You should see how good you look right now  
You should see how good you look right now Let the night, let the night, let the night, let the  
night

Follow you

Let the night, let the night, let the night, let the night

Follow you Take another deep breath

Look at your reflection

You're a beautiful thing

And it feels right

Give a little bit more

Try a little bit harder

Can do anything

Hear what the world is saying You should see how good you look right now  
You should see how good you look right now Let the night, let the night, let the night, let the  
night

Follow you

Let the night, let the night, let the night, let the night

Follow you Let the night, let the night, let the night, let the night

Follow you

Let the night, let the night, let the night, let the night

Follow you
