

# Fracture (feat. Vera Blue)

## SLUMBERJACK

How did we, run it straight into the ground  
All I say, all I do is bring you down  
Honestly, can we get back to the start I just hate this feeling now It's easier when we start  
It's better with the lights off  
Please just steal my trust  
Don't go overthinking  
Trying to rebuild this  
Just take it as it comes There is always something that pulls me on  
When it's all done can we begin  
Need to feel like you're still on my side  
Just take it as it comes When I'm alone  
I can feel you still on me  
Skin to skin  
I know you feel this chemistry  
Honestly, can we get back to the start  
I just hate this feeling now It's easier when we start  
It's better with the lights off  
Please just steal my trust  
Don't go overthinking  
Trying to rebuild this  
Just take it as it comes There is always something that pulls me on  
When it's all done can we begin  
Need to feel like you're still on my side  
Just take it as it comes  
There is always something that pulls me on  
When it's all done can we begin  
Need to feel like you're still on my side
