Nuclear

Destiny's Child

You Had your dreams

And i had mine

Eyes wide open

And we dreamed together

I never know how we keep

Our shit together

& I'm wondering

Is this love or Illusion

We're just getting better

When the two become one

On a Quatum Level

It's Nuclear

We're two here

Yjere's nowhere left to run

Why run? Why would u run?

It's Nuclear

We're two here

We both heat up

Going All the way eeh eeh x4You Had ur Half

& i had mine

But now there's no such thing

As you & me

I was so used to feeling incomplete

& I'm wondering

Is this love or Illusion

We're just getting better

When the two become one

On a Quantum level

It's Nuclear

We're two here

There's nowhere left to run

Why run? why would u run?

It's nuclear

We're two here

We're both heat up

Going all the way eeh eeh x4Anytime the climates change between us

We share a bond they can't restrict

That can't be touched

So amazing super power

Take over

Never lose the energyIt's Nuclear

We're two here

There's nowhere left to run
Why run? why would u run?
It's nuclear
We're two here
We're both heat up
Going all the way eeh eeh x4
