My Disease

A Skylit Drive

Awaken to the eyes of glazed humor
The haze in my somber eyes . it burns . so cold
The things you wish you could knowAs he enters into the world as a ghost
The terror inflicted scrapes your bones
Let him hold you close"look" where "over there" oh I see what you mean
Fear me

Step too close to see what I see

Construct desire

The fine line between disease and what I needAs he enters into the world as a ghost
The terror inflicted scrapes your bones

Let him hold you close
It's exactly what it seems
The horror I live
The evil that beats inside me
It's called "my disease"
