

# Tough Love

Jessie Ware

It's a really good sign that you hold my mind  
It's true  
And I've been thinking of what to say all night to you  
So you wanna be a man about it to you, do you?  
And have you figured out all you wanted, have you?  
When your heart becomes a million different pieces  
That's when you all be able to recognize its feeling  
That's called tough love  
That's called tough love  
That's called tough love  
That's called tough love  
In the middle of the night  
All I think about is you  
I dream in all your clouds, so sorry  
It's true  
So you wanna be a man about it  
Do you have to?  
And have you figured out all you wanted, have you?  
When your heart becomes a million different pieces  
That's when you all be able to recognize its feeling  
That's called tough love  
That's called tough love  
That's called tough love  
That's called tough love  
You have me crying out, crying out for more  
You have me crying out, crying out for more  
You have me crying out, crying out for more  
You have me crying out, crying out for more  
That's called tough love  
That's called tough love  
That's called tough love  
That's called tough love
