

# Closer

## Lacuna Coil

Want to get closer, in too deep  
Where there is something I wish for I'll go through  
Want to get closer into you  
No hell to discover  
I've got it all inside myself  
Salvation you have preached is gone  
No way, you can't turn it around Looking for a higher ground  
Searching for this something missed before  
From a higher ground  
Will I fall in a right direction?  
(Higher, searching for more)  
Falling apart  
There's nothing real  
That will convince me to change but I'll go through  
Want to get closer into you  
No hell to discover  
There is just nothing to betray  
Salvation you have preached is gone  
No way, you can't turn it around Looking for a higher ground  
Searching for this something missed before  
From a higher ground  
Will I fall in a right direction?  
(Higher, searching for more) Looking for a higher ground  
Searching for this something missed before  
From a higher ground  
Will I fall in a right direction?  
(Higher, searching for more)  
Looking for a higher ground  
Searching for this something missed before  
From a higher ground  
Will I fall in a right direction?  
(Higher, searching for more) Looking for a higher ground  
Searching for this something missed before  
From a higher ground  
Will I fall in a right direction?  
(Higher, searching for more)
