

# Stars and Sons

## Broken Social Scene

Then when you let it  
You asked for nothing  
Why don't you share it  
All of the time you live  
There's something out there This one will know, how far to live on  
This one will ever know in this town  
And in the red room  
At a distance  
How would you know it  
You're the same when you're living  
I don't know it  
It won't be this This one will know, how far to live on  
This one will know, how far to live on All of the time you wait, there's someone out there  
And no one can find all the red  
How would you show it  
You can see through the red  
I don't know it  
It won't be this time This one will know, how far to live on  
This one will know, how far to live on
