

# Leaving (feat. Yuna) [Acoustic]

[Ekali](#)

I don't really wanna try and change your mind  
If you can't find a way to love me, it's alright  
But you don't wanna wake up alone  
You want someone to keep you warm And if you're cold inside I'll start a fire  
But you just let it die  
And if you're lost inside I'll be your guide  
The moonlight in your sky But you know I can't stop you from leaving  
You know I can't stop you from leaving  
Everybody needs to stay stop breathing  
But you know I can't stop you from leaving  
Every time you feel low, mm  
I can't always be your hero  
Ooh, but you only think for yourself  
And you look out for somebody else And if you're cold inside I'll start a fire  
But you just let it die  
And if you're lost inside I'll be your guide  
The moonlight in your sky But you know I can't stop you from leaving  
You know I can't stop you from leaving  
Everybody needs to stay stop breathing  
But you know I can't stop you from leaving  
You know I can't stop you from leaving  
Everybody needs to stay stop breathing  
But you know I can't stop you from leaving  
Everybody needs to stay stop breathing  
But you know I can't stop you from leaving
