

# Burnout

## 10 Years

You've been dazed  
and confused for so long (so long)  
Singing along, you're singing along  
To the same old song  
You've been praised  
and abused by the amount (the amount)  
Of crosses and crowns you lost and found  
Echoing through the sound  
Their standing ovation drowns you out You burnout so bright  
But you never saw the light  
No never saw the light  
You let life pass on by  
No you never realised  
You got blinded by the ride  
You bought the ticket  
and took the ride (took the ride)  
Trying to pry open wide  
Your third eye  
It's just fear and loathing  
in disguise (in disguise)  
There's nowhere to hide from your lies  
We've all left your side  
On your own, the curtain's closed You burnout so bright  
But you never saw the light  
No never saw the light  
You let life pass on by  
No you never realised  
You got blinded by the ride  
You burnout so bright  
But you never saw the light  
You got blinded by the ride  
You burnout so bright  
But you never saw the light  
No never saw the light  
You let life pass on by  
No you never realised  
You got blinded by the ride  
You burnout so bright  
But you never saw the light  
No never saw the light  
You let life pass on by  
No you never realised

You got blinded by the ride
