

# Bones

## Equinox

Love is like a black hole  
Everything is dark  
You just gotta let go  
And feel it, feel it, feel it We fall off the deep end  
Just to get a rush  
You know that it's right when  
You feel it, feel it, feel it What is life  
If it's just of the earth  
Only of the flesh and bones Wanna thrive in the dust  
Of the universe and way  
Into unknown  
So I love beyond the bones  
Goes deep inside your soul  
I love beyond the bones I love beyond the bones  
I love beyond the bones Wanna be the fire  
Even if it burns  
Offer up my fibers  
To feel it, feel it, feel it What is life  
If it's just of the earth  
Only of the flesh and bones Wanna thrive in the dust  
Of the universe and way  
Into unknown  
So I love beyond the bones  
Goes deep inside your soul  
I love beyond the bones  
Goes deep inside your soul  
I love beyond the bones I love beyond the bones  
I love beyond the bones  
I love beyond the bones Into the unknown  
Into the unknown  
Where no other love goes  
I love, I love beyond the bones
