

# Fucked Me Right Up

Sean Hayes

Don't know that she knows  
What it is she doing  
Don't know that she knows  
How deep this will cut  
Can't believe you really think  
We'll make it through this oh  
You fucked me right up  
Just fucked me right up  
All alone in a house that we were living  
All that love just walked out the door  
She's off running around  
With a brand new man, oh  
You fucked me right up  
Just fucked me right up  
I got a long way to travel  
With a heaviness taking hold  
It takes along night  
When you unravel at home  
Don't know that she knows  
What it is she doing  
Don't know that she knows  
We are throwing it all away  
Tell me how you think  
We're gonna make it through this oh  
You fucked me right up  
Just fucked me right up  
Don't know that she knows  
Or even if it matters  
The cut's been made  
The dice have been thrown  
What was our love worth  
If it's something we could gamble oh  
You fucked me right up  
Fucked me right up  
Goodbye goodbye  
Goodbye goodbye
