

# Free Radicals

## Our Last Night

Overconfident, too proud  
Self-centered, too loud  
We'll never hear through the noise  
Compelling arguments  
In a reality we don't live in  
We'll never hear through the noise Don't wanna swallow our pride  
Just wanna follow the tides  
Until the wheels fall off  
And we're driving blind  
Swerving over the line We're living like free radicals,  
Destroying every rational chemical  
If we're too far to see the other side  
Short sighted views become our guide  
We're living like free radicals  
Destroying every rational chemical  
Short tempered, too cold  
Confined to a mold  
We'll never hear through the noise  
A never ending push and pull  
Of opinions, but no truth  
We'll never hear through the noise We're living like free radicals  
Destroying every rational chemical  
If we're too far to see the other side  
Short sighted views become our guide  
We're living like free radicals  
Destroying every rational chemical Feeding off the enemy  
Most threatening to our beliefs  
In a never ending battle for control We're fighting fire with fire  
Finger on the trigger, always ready to pull it  
We fear the truth like a liar  
We're living like free radicals  
Destroying every rational chemical  
If we're too far to see the other side  
Short sighted views become our guide  
We're living like free radicals  
Destroying every rational  
Destroying every rational chemical
