

# Get Me Right

## Theophilus London

Vibes, vibes, vibes  
( )  
Bad boy is back back time  
Back down now  
Nine girls, they freak me in the room  
I found God  
Gimme power, hear my spirit, heavenly Lord  
Thou shall not  
Take my arm and eject yo system  
Why>? Just to make me a victim?  
What ya want? What ya got? What you got, what you wanted?  
I can feel the force take ova  
From the back to the front  
And the boys and the girls from the future  
Bring us back all the love  
Indigo baby is stuck in the misses? the farm, the electric connections  
When you got someone who can fight for you, give ya what you need  
Know your every move, can get close to eyes and just catch the groove  
Take control of me (girl), come over me, baby just set me free  
And inject your soul, my heart  
(2)  
Right by now, reset(?) yo clock  
It's about time now  
Yeah, ye was with the shit all summer, but  
I shall not  
Take a look over your soldiers  
They give me the blues  
Rule no. 2, I got nothing to lose  
And love has been away and confined in the groove  
( )  
Take control of me (girl), come over me, baby just set me free  
And inject your soul, my heart
