

Every Night

Josef Salvat

Uh, uh, uh

You know they all say

That you're much more than this best the face deserts

But they don't get you need

They don't tell you cause your dignity comes first

I've got to keep you coming home! I got to be with you every night

Insulation

The battle's been fought and it's been won

You have told me you don't know where you run.

But I don't care cause you come back for my love

I always keep you coming home! I got to be with you every night

Got to be with you every night

Got to be with you every night

Got to be with you every night Too many times,

Too many times I have waited in line

Waited in line,

Waited my turn, but not tonight!

Tonight breaks established rules

Just tell me we've been caught up in for too long tonight!

I got to be with you every night

Got to love you, got to love you!
