

Vegas Skies

The Cab

It's twelve o' clock and I need your attention
It's like the alcohol
Making my head spin
Your scent is the rum
The room is a bottle
Keeping me hopeless until I wake tomorrow
If tonight ever makes a difference
The way that I feel
The way that I'll remember it
I'll take this down until the glass remains
Swallow the words that I was meant to say
It's a long drive back to Vegas skies
So why don't I make one more wrong turn tonight
So say goodnight
Our first goodbye
I've only got forever and forever is fine
Just take your time
We'll stop the clock together and know that the timing was right
All of these guards they stand
tall and defensive
Putting up walls around what was once innocent
It won't let me in, but I'm stronger than that
Because you stole my eyes and I've never looked back
Girl, last night I forgot to mention
The way that I feel, the way that I'll remember this
When we're this young
We have nothing to lose
We just the clock to beat and a hand to choose
It's a long drive back to Vegas skies
So why don't I make one more wrong turn tonight
So say goodnight
Our first goodbye
I've only got forever and forever is fine
Just take your time
We'll stop the clock together and know that the timing was right
It's a long way down
Just fall into place and you'll fall into me
We'll make it out
You'll see
So say goodnight
Our first goodbye
I've only got forever and forever is fine
Just take your time
We'll stop the clock together
So say goodnight
Our first goodbye
I've only got forever and forever is fine
Just take your time

We'll stop the clock together and know that the timing was right
